PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in full-stack development, cloud deployments, automation engineering, and production support. Skilled in Django, Angular, AWS, CI/CD pipelines, REST APIs, and scalable application development. Experienced in production deployments, client handling, automation workflows, and system optimization.

SKILLS

Languages	Python, JavaScript, HTML5, CSS3
Frameworks	Django, FastAPI, Angular, Bootstrap
Databases	MySQL, PostgreSQL, MongoDB, SQLite
Cloud & DevOps	AWS EC2, AWS Lightsail, Jenkins, Docker, GitHub Actions, CI/CD Pipelines
Architecture	REST APIs, Async APIs, WebSockets, Microservices
Automation	Selenium, Playwright, BeautifulSoup, PyAutoGUI
Machine Learning	Scikit-learn, Pandas, Matplotlib
Security	JWT Authentication, Role-Based Access Control (RBAC)
Tools	Linux, Git, GitHub, Postman

EXPERIENCE

Senior Software Support Engineer Ecesis Technologies	April 2026 - Present Kerala, India
--	---------------------------------------

- Managing end-to-end production deployments and release cycles for multiple internal and client-facing applications.
- Leading cross-functional teams and coordinating with clients during project delivery and technical discussions.
- Managing AWS cloud infrastructure including EC2, RDS, and Load Balancers to ensure application reliability.
- Collaborating with development teams to build scalable web applications and automation systems.

Software Support Engineer Ecesis Technologies	April 2024 - April 2025 Kerala, India
---	--

- Led end-to-end deployment and release management for 6+ internal and client-facing applications using AWS EC2, RDS, and Jenkins, improving deployment reliability by 40%.
- Built and maintained full-stack web applications used daily by 1,000+ internal users to support core business and automation workflows.
- Designed CI/CD pipelines that reduced manual deployment effort and accelerated feature rollouts across development and production environments.
- Developed revenue-generating automation features adopted in customer-facing products, contributing to increased company revenue.
- Improved application security by implementing JWT-based authentication and enforcing role-based access control across 5 production services.

Junior Support Engineer Ecesis Technologies	Mar 2023 - April 2024 Kerala, India
---	--

- Built scalable full-stack applications using Django, Angular, and MySQL to support internal business operations.
- Created Selenium-based automation tools that reduced repetitive manual tasks by 60%, improving team productivity.

- Diagnosed and fixed over 100 functional and performance issues, increasing product quality metrics from 62% to 92%.
- Collaborated with senior engineers to enhance backend APIs and database queries, resulting in faster feature delivery.

Full Stack Intern

Sep 2022 - Feb 2023

One Team Solutions

Kerala, India

- Developed responsive web interfaces using Django and Angular.
- Improved application performance by refining frontend components and database queries, reducing page load time.
- Assisted in backend development, API integration, and database management for web applications.

PROJECTS

Tail Cart – E-Commerce Platform

GitHub: github.com/Gokulgopan01/Tail-Cart-frontend

Live Site: tailcart.vercel.app

- Designed and deployed a scalable e-commerce platform capable of handling 1,000+ concurrent users.
- Implemented JWT-based authentication and role-based authorization to secure user access.
- Integrated Gemini AI-powered pet health assistance features to provide AI-powered pet health recommendations for users.
- Deployed the application on AWS EC2 with RDS and Load Balancer to ensure high availability.
- Reduced average API response time by 35% by limiting payload size and improving query efficiency.

Solvers Global – Overseas Consultancy Platform

Live Site: solversglobal.in

- Developed a scalable overseas consultancy platform using Angular and FastAPI with a microservices-ready architecture for future scalability.
- Implemented asynchronous backend processing using FastAPI async features and AioMySQL to improve application performance and reduce response latency.
- Enhanced platform security using JWT authentication, secure password hashing, token validation, role-based access control, and API rate limiting.
- Optimized application speed using pagination, lazy loading, caching strategies, and efficient database query handling for faster page loads.
- Integrated Alembic for database migration management and designed scalable REST APIs to support future high-traffic expansion.

Stock Prediction Model

GitHub: github.com/Gokulgopan01/Stock-AI

- Built a machine learning-based predictive model to forecast short-term stock price movements.
- Used Scikit-learn, Pandas, and historical stock datasets to train and evaluate regression models.
- Integrated predictive insights into a web-based dashboard for simplified analysis.

EDUCATION

Diploma in Computer Engineering

2019 - 2022

Government Polytechnic College Neyyattinkara

Thiruvananthapuram, India

AWARDS

- Newbie of the Quarter – 2023
- Engagement Champion – 2025
- Engagement Champion – 2026
